

Seven ways to be smart	Bloom's Taxonomy: Six Thinking Levels					
	Knowing - 3	Understanding - 4	Applying - 5	Analysing - 6	Creating - 7	Evaluating - 8
Verbal I enjoy reading, writing & speaking	Record notes from one DVD. Present in mind map	Research and write an information report on how hurricanes are named.	Choose one natural disaster and write an explanation as to how it occurs, include a labelled diagram.	Complete a Tri-Venn diagram comparing & contrasting 3 different natural disasters.	Conduct a debate: A tsunami is more deadly than a heatwave Evaluate the debate and record in written form.	
Mathematical I enjoy working with numbers & science	Discuss and draw the shapes you can identify in Natural disasters. Eg zigzag in a lightning bolt, funnel shape in a tornado, triangular shape of a volcano, spiral shape in hurricane photos	Investigate the death toll for 10 natural disaster events Graph the death toll for 10 natural disaster events		Scientific experiment – Make a TWISTER in a jar and a TORNADO in a bottle Write experiment procedure including results and diagram Compare and evaluate the effectiveness of your experiments.		
Visual/Spatial I enjoy painting, drawing & visualising		Use the BAR key to make changes to your house to protect it from an earthquake.	Design, draw and label a rain hat that collects and saves the rain fall for recycling. Add an explanation defining how it would work.		Choose one known natural disaster event and re-create through a labelled diorama. Evaluate your creativity and effectiveness.	
Kinaesthetic I enjoy doing hands-on activities, sports & dance	Play 'Celebrity Heads' – What disaster? Record in science book.	Play 'Fact Bingo' – Make your bingo cards about natural disaster facts.	Construct a wind gauge to record local weather over a period of 3 days. Compare the accuracy of your test with data from another source (eg local newspaper/radio)		Construct a working model of a volcano. Evaluate your success using a scale of 1 to 10.	
Musical I enjoy making & listening to music	Brainstorm songs about the weather.	Compose a soundscape to replicate a natural disaster using instruments, music programs etc	Write a limerick based on one natural disaster and/or event.	Use Acid Music Studio to compose and perform a song about a natural disaster.		Evaluate either your soundscape or song using a PMI.
Interpersonal I enjoy working with others	In pairs plan, perform and record a news broadcast relating to a particular natural disaster		Research, design, create and evaluate a presentation to demonstrate how a natural disaster occurs. Share your presentation on home class Wiki space.			
Intrapersonal I enjoy working by myself	The Answer is: the 'South Asian Tsunami'. List 5 possible questions.	Investigate and design a safety brochure that includes relevant information, survival tips etc relating to one natural disaster situation.		Which natural disaster would be of the greatest concern for your home? Why?	Contribute items of interest relating to this unit of work to Wiki. ie photos, QuickTime movies, reports.
